

CETRIS® LASUR

is a cement bonded particleboard with smooth surface coated with pigmented primer and final translucent coloured paint in shades according to the colour table.

The biggest producer of the cement bonded particleboards in Europe

Cement bonded particleboard 10 - 32 mm thick with smooth surface coated with pigmented primer and final translucent coloured paint in shades according to the colour table. The coating with translucent paint does not create uniform and compact appearance. On special order also the boards 34, 36, 38 and 40 mm can be delivered. The basic size of the board is 3350 x 1250 mm. Available additional processing of the board is similar as with the CETRIS BASIC boards. The CETRIS LASUR boards are used mainly as façade cladding.

The back side of the CETRIS LASUR board is coated with protective primer of irregular structure and/or appearance and of insufficient covering power. This coating has not any specific colour shade. Eventual request for white or transparent colour has to be specified when ordering.

CETRIS® LASUR nomenclature

Please note: the colour table is approximate only

CETRIS® LASUR 001	CETRIS® LASUR 002	CETRIS® LASUR 003	CETRIS® LASUR 004
CETRIS® LASUR 005	CETRIS® LASUR 006	CETRIS® LASUR 007	CETRIS® LASUR 008 ^N
CETRIS® LASUR 009 ^N	CETRIS® LASUR 010 ^N	CETRIS® LASUR 011 ^N	CETRIS® LASUR 012 ^N

Technical specification:

Basic size:
3350 x 1250 mm

Board thicknesses:
10-12-14-16-18-20-22-24-26-28-30-32 mm
on special order also 34-36-38-40 mm

Density:
1150 - 1450 kg/m³

Additional processing:
on customer's request: cutting, drilling, chamfering

Surface:
smooth, coated with pigmented primer and final translucent coloured paint

Colour shades:
according to the CETRIS LASUR colour table
